EXPERIENCE

Full Stack Developer at [Ambition.so](https://ambition.so)

January 2022 - Present

- Built an entire NFT generator that is 7x faster than the previous version.
- Worked on improving user flow and UI design that follows usability and accessibility best practices.
- Communicated with team members through standup meetings
- Debugged, fixed and maintained 60% of the codebase.

SELECTED PROJECTS

[nfthost](#) — Generate and Host NFT collections

- Developed an entire full-stack web application alone that involves planning, designing, implementing, and maintaining a web application (offering NFT Utilities and Website Hosting).
- Implemented a crypto wallet authentication with JWT and secured REST API routes by using access tokens and middleware validators and sanitizers.
- Succeeded in creating my own method of generating an entire NFT collection by using HTML Canvas.
- Partnered with other Web3 companies such as [Thirdweb](#), [Flair](#), and [Web3 Philippines](#)

[emoji.io](#) — Hangout and meet new friends through a multiplayer game

- Collaborated with a fellow student in college, which involved doing Git best practices.
- Created a hosted payment system with Stripe that sends confirmation text messages and emails using Twilio and Mailjet.
- Achieved continuous integration and deployment by using Git, Git Actions and Vercel.

EDUCATION

Diploma in Computer Studies
Langara College – Vancouver, BC
Cumulative GPA: 3.79/4.33
Dean's Honour Roll, 3 Terms

September 2020 – August 2022
